## Medical Department.

---

The Thirty-third annual course of instruction in this Department will commence on Monday, the 14th of November,\* 1870, and terminate on the second Saturday of March, 1871. Preliminary Lectures on Clinical Medicine and Surgery will be delivered in the amphitheatre of the Charity Hospital, beginning on the 18th of October, without any charge to students.

In making this announcement, the Faculty would congratulate the numerous alumni and friends of the Institution upon its continued prosperity, and upon the largely increased facilities for instruction, which, through the liberality of the Legislature of the State, they can now offer to those who desire to make themselves proficient in the various departments of medicine. The means of teaching now at the command of the Faculty are unsurpassed in the United States; and are quite as complete as those of many of the renowned Schools of Medicine abroad. As evidence of this, it may be stated that in addition to the regular didactic lectures given by the several Professors, there is attached to each separate Chair, a Practical Department, in which students can observe and verify for themselves the facts inculcated and discussed in the Lecture Room. To these have been added departments for teaching practically several special subjects, such as Diseases of the Eye and Ear, Auscultation and Percussion, Minor and Operative Surgery, etc., etc. It is to this peculiar feature of the University, and its unequalled Hospital advantages, that the Faculty would direct the attention of those engaged in the study of medicine, or who having graduated elsewhere, desire to perfect themselves in any particular branch of the profession.

### *DIDACTIC LECTURES.*

Systematic didactic instruction in the various branches, will be given daily in the central building of the University, situated on Common street, between Baronne and Dryades streets. The means for illustrating this course consists of a large collection of Natural Anatomical Pieces, prepared by, and under the immediate direction of, the Professor of Anatomy; Models in Wood, Wax, Plaster, and Papier Maché of rare and beautiful workmanship, executed in London, Paris and Florence expressly for the University; a complete series of Specimens in Materia Medica; Surgical and Obstetrical Instruments and appliances; Specimens in Morbid Anatomy; and an entire set of Chemical and Philosophical Apparatus.

The Museum comprising these collections has been recently re-arranged and

\* In case an Epidemic of Yellow Fever should occur during the summer, Students may, nevertheless, have no hesitation in coming to the city at the time here designated. During the thirty-two years of the existence of the Medical Department no student has been known to die of Yellow Fever during attendance upon lectures.

classified, and is accessible to students and visitors at all hours of the day. During the past year, large and valuable additions in Comparative Anatomy and American Archæology have been made by Professor Joseph Jones, M. D.

#### **LIBRARY and READING ROOMS.**

The large building known as the East Wing of the University, having been recently appropriated to and connected with the Medical Department, the Faculty have succeeded in establishing a Free Library and Reading Room for the use of students and physicians. The spacious hall selected for this purpose now contains a large collection of books already in the possession of the Institution, which are thus made accessible to those who may desire to consult them.

#### **CLINICAL INSTRUCTION.**

The act establishing the University of Louisiana gives the Professors of the Medical Department the use of the Charity Hospital as a school of practical instruction.

The Charity Hospital contains 630 beds, and its advantages for professional study are unequalled by any similar institution in this country. The Medical, Surgical and Obstetric Wards are visited by the respective Professors in charge daily, from 8 to 10 o'clock A. M., at which time all the students are expected to attend and familiarize themselves, *at the bed-side of the patients*, with the diagnosis and treatment of all forms of injury and disease.

Special instruction will be given to the Candidates for Graduation, who will for this purpose, be divided by the Dean of the Faculty into sections, and assigned to respective Professors in charge of wards in the Hospital. The section thus formed will interchange courses monthly to enable the candidates to enjoy equal advantages. Thoroughly competent physicians as Chiefs of Clinic will aid the Clinical Teachers in developing to its full extent this system of instruction. The following Professors and their respective Chiefs of Clinic have been selected by the Faculty for the ensuing session:\*

PROF. JAMES JONES, M. D.....	DR. JAMES JONES, JR.
" WARREN STONE, M. D.....	DR. WARREN STONE, JR.
" S. M. BEMISS, M. D.....	DR. THOMAS LAYTON.
" S. E. CHAILLÉ, M. D.....	DR. W. H. WATKINS.
" F. HAWTHORN, M. D.....	DR. FRANK TIPTON.
" JOSEPH JONES, M. D.....	

PROF. JAMES JONES, M. D., will have charge of Obstetric wards, and provide the Candidates with cases of labor whenever practicable.

PROF. T. G. RICHARDSON, M. D., will attend Surgical wards to which Students will be admitted.

The *Regular Lectures* at the Hospital, on Clinical Medicine and Surgery, and Special Pathological Anatomy, are delivered in the amphitheatre on Monday, Wednesday, Thursday, and Saturday, from 10 to 12 o'clock, A. M.

*Post-mortem Examinations* are made in the presence of the Class.

---

\* Students not candidates for graduation may make their daily hospital rounds with either one of the clinical teachers.

**REQUISITES FOR GRADUATION.**

- I.—The candidate must be twenty-one years of age, of good moral character, and must present to the Dean a certificate from his private preceptor, or exhibit other satisfactory evidence that he has been engaged continuously in the study of medicine for three years, inclusive of attendance upon lectures.
- II.—He must have attended two complete courses of lectures, the last of which must have been in this institution.
- III.—He must write a Thesis on a medical subject, and present it to the Dean one month before the close of the session.
- IV.—He must pass a satisfactory examination before the Faculty,

**TERMS:**

For the Tickets of all the Professors.....	\$140 00
For the Ticket of Practical Anatomy.....	10 00
Matriculation.....	5 00
Diploma.....	30 00

Graduates of other respectable schools may attend all the lectures upon payment of the matriculation fee; but they will not be admitted as candidates for the Diploma of the University except upon the terms required of second course students. All fees are payable in advance.

**TEXT BOOKS:**

Churchill's or Tyler Smith's Midwifery,  
 Marshall's Outlines of Physiology.  
 Erichsen's or Druitt's Surgery,  
 Fowne's or Graham's Chemistry, or Bowman's Practical and  
 Medical Chemistry,  
 Ringer's or Waring's Therapeutics and U. S. Dispensatory,  
 Headland's Action of Medicines,  
 Tanner's, Flint's, Aitken's or Watson's Practice of Medicine,  
 Richardson's or Harrison's Anatomy,  
 Gross's or Jones' & Seiveking's Pathological Anatomy,

Boarding of Students is as cheap in New Orleans as in any other large city. The Janitor resides in the University Building, and will aid the Students in procuring boarding and lodging.

The Administrators of the Charity Hospital elect annually, in March, twelve Resident Students, who are maintained by the institution.

T. G. RICHARDSON, M. D.,

*Dean of the Faculty.*

NEW ORLEANS, June, 1870.

The Faculty takes this opportunity of calling the attention of its friends to the fact, that it desires to obtain the information requisite to publish a complete catalogue of all its Graduates. A favor will therefore be conferred by those who will give notification of the present Post-Office addresses, or of the deaths, with the date, place, and cause thereof, of any of the alumni of this institution.

The additional information desired as to every Graduate is—the name in full; the place and year of birth; the place of residence, length of time there, and any contemplated change of residence; the present occupation, if not in the practice of medicine; any degrees conferred, when and by what institution; any and what contributions to science; the rank and service in the army; and any public offices held, and honors received.

Letters furnishing all, or part, of the above information as to any Graduate, should be addressed to

PROF. STANDFORD E. CHAILLÉ, M. D.
